

IMO / MED-CERTIFIED FIRE-RATED PLYWOOD FOR THE MARITIME INDUSTRY

*Innovation that
challenges flames*

Fireproofing

Low carbonization, scarce smoke emission and absence of flaming particles.

Fire-rated

100% of the panel, even after sanding or machining.

Surface quality

Ideal for painting or coating with a decorative final finish.

Exceptional qualities

Easy to machine, lightweight and stable.

Sustainability

Certified European fast-growing tree farms.

garnica

Challenge the ordinary

IMO / MED-CERTIFIED FIRE RATED PLYWOOD FOR THE MARITIME INDUSTRY

Fireproof plywood for the maritime industry in the construction of large vessels, modified through an innovative treatment that provides the panel with exceptional fire resistance, even after sanding or machining.

IMO / MED certificate that accredits its excellent results in maritime applications.

Composition based on European wood from fast-growing tree farms, with excellent physical and mechanical properties, such as ease of machining, lightness, uniformity, stability, and high surface quality.

Faces with natural colorations, as well as those intrinsic to the flame-retardant treatment and the frequent presence of knots. Both faces have been repaired. Ideal for covering or for raw use in applications that do not require a high aesthetic demand.

Applications:

Fireshield Marine is specifically designed for the maritime industry to construct large vessels, both passenger and freight, as well as other types of industrial vessels, such as fishing boats, yachts, and recreational boats.
