

# THERMORY®

## LEAVE A LASTING IMPACT

We believe wood is the best building material in the world. Why? Because it's the only naturally renewable building material that is reusable, sustainable, and doesn't generate hazardous waste.

Our products include decking, cladding, porch flooring, and saunas made of thermally modified wood and industrially painted wooden products for indoor and outdoor use.

To enhance your space with natural beauty that endures, choose Thermory.

## Heat. Steam. Cool. Done.

Thermal modification is a chemical-free process that gives you the beauty of real wood, naturally enhanced with only heat and steam for unequalled strength and stability—even in changing weather conditions. And, with greater insulating properties compared to unmodified wood, our wood is never too hot on your feet.

Thermally modified

Rot resistant

Weather resistant

## The right wood. The right way.

We source all our wood using responsible forestry practices, never laying a finger on our tropical woodlands and rainforests. And wood is the only naturally renewable building material that doesn't generate hazardous waste. So, when you choose Thermory, you're not just investing in quality, but in the health of our planet too.

## Install with ease.

Put installation nightmares behind you with a range of installation systems designed to help you work with efficiency and ease. This includes the Press & Click System powered by Grad (PaCS)—Thermory's own innovative cladding system that let's you install your boards with a simple press and click. And, like all our thermally modified products, PaCS boards give you 20+ years of rot resistance and durability.
